

***SunQuest Aviation, Inc.***  
***Bahamas Rental Policy***

The basic requirements for a Bahamas rental is as follows:

Instrument Rating  
Total Pilot Flight Time            250 hours  
Time in Type                            10 hours  
Passport  
Restricted Radio Operators Certificate

**PLUS**

The pilot must complete the SunQuest Aviation Bahamas checkout, demonstrate minimum instrument navigation and flying ability, and sign the Bahamas agreement.

There is some flexibility in the minimum hour requirements and these can be evaluated on an individual basis. These requirements are necessary because most flights over water will be very near instrument conditions. This is not the time to be uncertain of your ability to navigate without ground reference.

A flight plan must be filed and activated. At some airports this may mean climbing to an altitude over the island and contacting Nassau radio before proceeding enroute.

The following items must be carried with you when flying to the Bahamas or over water:

Life Vest for each passenger  
Survival Kit which includes: flare gun and flares, signaling mirror,  
whistle, flash light, thermal/reflective blanket  
Raft is not required but available for a small rental fee  
EPIRB is also available for rental

This list is not all encompassing. You should evaluate your needs and include any other items that may increase your margin of safety. Our interest is to ensure you have a safe and enjoyable flight.

In addition you agree not to hold SunQuest Aviation, Inc. (its officers, directors, managing agents and employees, or any other person who may acquire an interest in SunQuest Aviation, Inc.) responsible for any injuries resulting from the use of the survival equipment, nor from its faulty performance

A deposit of \$1,500.00 is required prior to departure. The deposit can be paid in cash, or by Visa or MasterCard. This money will be refunded when you have returned the aircraft safely to SunQuest or can be used towards the balance owed for your trip.

You are responsible for all risks, including any theft or damage to the aircraft. Since maintenance and parts are difficult to find at most Caribbean airports, even minor problems may require that SunQuest fly a mechanic, tools, and parts to you. You will be responsible for any and all expenses necessary to return the plane to the North County Airport. Although this is unlikely, you need to be aware of the risks.

### **Daily Minimum Requirements**

The daily minimum requirement varies from 2-4 hours per day, depending on the day of the week and the time of year. There are times when SunQuest is very busy and these requirements must be enforced, however, we will always make every attempt to accommodate a reasonable request.

SunQuest will reimburse fuel up to the current rate at North County upon presentation of a valid receipt.

### **Aircraft Rental Rates**

Aircraft permitted to fly to the Bahamas: Cessna 172SP, Liberty XL2, Diamond DA40.

I hereby certify that I have been briefed on the preceding policies and requirements, as well as US and Bahamian Customs and Immigration requirements. I also certify that I have successfully completed the SunQuest Bahamas checkout and am fully aware of my responsibilities as the Pilot in Command. I agree that at all times, I will conduct myself and operate the plane in accordance with all SunQuest policies, international laws and ICAO rules regarding international flight. I agree that I will not operate the aircraft outside of the territorial limits of the Bahamas and Caribbean. I will provide SunQuest a detailed itinerary and will not deviate from it without prior notification. I further certify that I, as well as all my passengers, are permanent US residents or we each have a US Visa valid for the expected period. If I return and US Immigration determines that I or my passenger does not have a valid Visa, I am subject to a penalty of \$3,500.00 for violation of US law.
